

Graduate Financial Aid

190 Introduction

The Faculty of Graduate Studies and Research (FGSR) administers several graduate awards programs and distributes information on sources of graduate student funding. This brochure is intended to serve as a guide to students who are attempting to finance their graduate education, and to departments in advising students.

Students should note that the FGSR is neither aware of nor administers every award available. While the FGSR tries to provide comprehensive information on financial support, students should not assume that the material which follows is exhaustive, but should continue to explore other avenues of funding.

190.1 Financing Graduate Education

There are several ways in which graduate students can finance their studies at the University of Alberta. Some financial assistance programs are administered by the FGSR and others are administered by other campus offices or outside organizations.

- Graduate Teaching or Research Assistantships
- Other Departmental Support
- University-administered Awards
- Awards Administered by Other Agencies
- Loans and Bursaries
- Funds for Study Abroad/International Student Exchanges

190.2 Reference Material

Students may consult in person the following reference books on financial support for graduate studies, located in the Humanities and Social Sciences Library (Rutherford North Building at the University of Alberta):

- *Annual Register of Grant Support*
- *Directory of Research Grants*
- *Directory of Financial Aids for Women*
- *Foundation Grant Index*
- *Grants Register*
- *Study Abroad*
- *Scholarships, Fellowships, Grants and Loans*

The Herbert T Coultts (Education) Library in the Education South Building has the following reference books:

- *Awards Almanac*
- *Canadian Directory of Awards for Graduate Study*
- *Funding for US Study: A Guide for Foreign Nationals*
- *Scholarships Guide for Commonwealth Postgraduate Students*

190.3 Graduate Teaching or Research Assistantships

Graduate Assistantships involve teaching or research duties and are administered according to a central policy of the University. Students must apply directly to their chosen department and should contact the graduate coordinator of that department for details and deadlines. Assistantships are awarded by departments primarily on the basis of academic standing and ability to perform the required duties.

Most departments suggest that students apply by March 1 before the Winter Session (beginning in September) in which the student hopes to receive an assistantship. Full-time assistantships require an equivalent of 12 hours of work per week over the four-month term of appointment. Part-time assistantships are available in some departments. The rate of remuneration for a full-time assistantship (1995/96 rates) is from \$4,297 to \$5,868 for a four-month term. More detailed information can be found in the publication *Regulations Governing Graduate Assistantships* available from the FGSR or departments.

Foreign students must obtain a Student Authorization from Employment and Immigration Canada in order to be eligible to hold a graduate assistantship.

190.3.1 Other Departmental Support

In addition to the sources listed below, departments may offer other opportunities for graduate student support. You should contact the department directly regarding such support.

190.3.2 Research Grant Support

Support may be available to some students from research grants made to departments or staff members. The amount of support will vary with the nature of the research grant and the regulations of the granting agency. Students should contact their supervisor for more information.

190.3.3 Demonstrators and Markers

Demonstrators and Markers are students who are hired on an hourly basis to assist a department's teaching program. They have assigned duties similar to some of those performed by graduate assistants. Qualified graduate students are first considered by departments for appointments as graduate assistants. Only those graduate students who are not awarded graduate assistantships in accordance with written University and department selection procedures should subsequently be considered for appointments as demonstrators and markers.

190.4 University-Administered Awards – General Information

Through the Graduate Scholarship Committee (GSC), the FGSR is involved in the adjudication of many awards. The GSC administers and adjudicates the annual general awards competition, approves new awards, and develops graduate awards policy. Numerous other graduate awards in specific fields are administered by individual departments and faculties. See the descriptions of University-administered awards listed alphabetically later in this document. In order to be eligible for graduate awards, a First Class academic standing (7.5 - 9.0 GPA) must be maintained.

In the general awards competition, graduate awards are offered primarily on the basis of superior academic standing and demonstrated potential for advanced study and research. Applicants are assessed according to a combination of departmental evaluation and recommendation, grade point average, reference letters, statement of program, research potential and productivity where it has been demonstrated and evidence of publications or other scholarly achievement. In all cases, the GSC only considers applicants who have been nominated by the department.

Applicants must either be in a degree program in the FGSR at the University of Alberta or in the process of applying to a department in which admission is sought. Students admitted as Qualifying or Probationary graduate students are not eligible for scholarships and fellowships. Unless otherwise stated in the award description, in order to take up an award students must be registered full-time in a graduate degree program at the University of Alberta.

Students must contact their department directly for information on applying for these general awards and to ascertain whether they are eligible to receive an application form or to apply. While you are encouraged to look for as many sources of financial support as possible please keep in mind that there is strong competition for these general awards and that all departments have a limitation on the number of applications which can be nominated for these general awards. Students who have been supplied with an 'Application for General Awards' should send all documentation to the department to which they are applying or in which they are registered.

The FGSR has a deadline of **February 1** for receipt of applications for general awards from departments; however, students should contact their department regarding internal deadlines for receipt of documents and application forms. The general awards consist of the following:

- Izaak Walton Killam Memorial Scholarships
- Dissertation Fellowships
- Province of Alberta Graduate Fellowships
- Province of Alberta Graduate Scholarships
- Andrew Stewart Memorial Graduate Prizes

Before completing your 'Application for General Awards' you should ensure that you meet the eligibility requirements for the awards in which you are interested. Descriptions of these and other awards are provided later in this document.

Regulations Governing Graduate Awards Administered by the Graduate Scholarship Committee

Regulations governing graduate awards administered by the Graduate Scholarship Committee (GSC) are outlined in *Graduate Awards Student Handbook: A Manual of Regulations and Procedures*. The Faculty of Graduate Studies and Research provides a copy of this Handbook to all winners of GSC administered awards.

190.5 Awards Administered by Other Agencies – General Information

Students are urged to seek awards from other agencies (such as SSHRC, NSERC, etc.). Information regarding such awards is provided later in this document and in the reference materials listed above. While SSHRC and NSERC applications are made available to students in the departments by mid-August each year, students may also wish to contact these and other external agencies directly.

190.6 Loans and Bursaries

190.6.1 Government Financial Assistance (Student Loan Programs)

The Canada Student Loans Plan permits full-time and part-time students to borrow money on the basis of financial need. Applicants must be Canadian citizens or have permanent resident status, have lived in Canada for at least one year and state an intention to live in Canada after graduation. Students whose home residence is, or has been, in another province during the past twelve months should apply through that Province.

In the Province of Alberta the same application form serves both the Provincial Students Finance Act and the Canada Student Loans Plan. Assistance may be given under one or the other or both plans in response to the application form.

Further details and application forms are available from either:

Student Financial Aid and Information Centre, Room 302G, Student's Union Building, University of Alberta, Edmonton AB, T6G 2J7, Telephone (403) 492-3483. Fax: (403) 492-9607

or

Students Finance Board, 10th Floor, Baker Centre, 10025-106 Street, Edmonton, Alberta, T5J 4P9, telephone (403) 427-2740.

190.6.2 Financial Need Bursaries

Administered by the Student Financial Aid and Information Centre (see address above), the bursaries are available to students who meet specific criteria. Financial need bursaries are non-repayable awards which are allocated primarily on the basis of financial need. Since bursary funding is limited, awards are normally made only after a student has explored all other avenues of financial aid. Contact the Centre for additional information.

190.6.3 Emergency Loans

Loans are administered by the Student Financial Aid and Information Centre (see address above). Emergency loans are available to cover essential living expenses when an unanticipated event has caused a shortfall in a student's budget. Normally the maximum loan available is \$300, with a limit of one loan per term. Such loans must be repaid within three months so that other students may have access to the funds. Contact the Centre for additional information.

190.6.4 Foreign Students

At this University, foreign students may hold departmental teaching or research assistantships, stipends from some research grants, the Izaak Walton Killam Scholarships, the Alberta Research Council (Karl A Clark) Memorial Scholarships, and the FS Chia PhD Scholarship (see award descriptions below).

Foreign students are not eligible to apply for funding from provincial and federal government loan programs. The Ministry of Education in your home country may have information regarding possible sources of funding.

190.6.5 Study Abroad/International Student Exchanges

The International Centre, at 172 HUB International, offers a comprehensive resource area which contains information on opportunities for students to work, study and volunteer abroad.

One such opportunity is an 'International Student Exchange,' which is an agreement between this University and certain foreign institutions to allow registered students to spend a term, session, semester or year at

the other institution. All or part of the student's course work at the exchange institution will be considered for credit by the appropriate faculty or school of the home institution.

At this University an exchange student from a foreign institution is normally registered as a Visiting Student. Non-reciprocal agreements whereby University of Alberta students study in a foreign institution are also available. The *Guide to International Student Exchanges*, which contains descriptions and criteria of each exchange, is available for consultation at the Centre.

The following sections provide award descriptions for University-administered awards and awards from outside agencies.
